

# The Impact of Asset Management Programs

## Minimizing Risk • Maximizing Productivity

**Manufacturers are struggling with unpredictable MRO costs, lagging OEE/RONA metrics and accuracy of spare parts inventories**

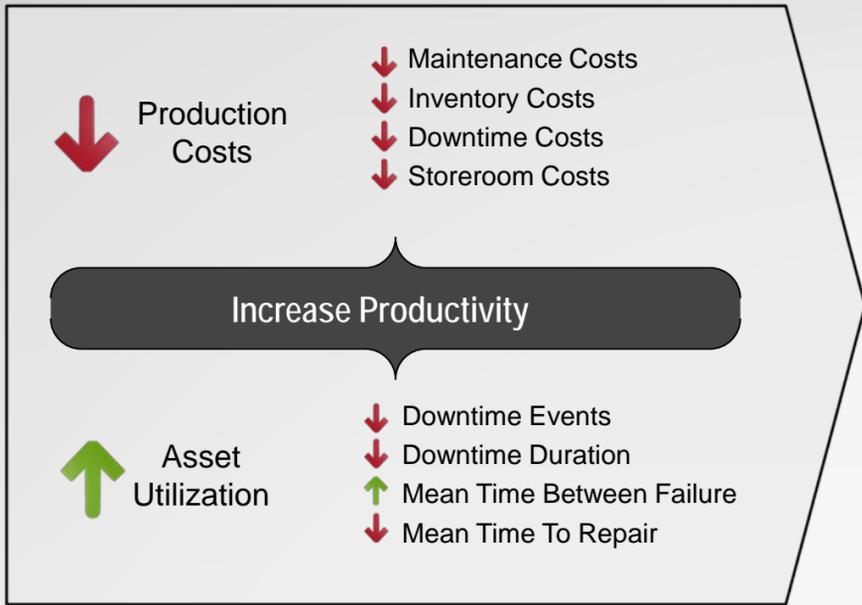

*Establish a baseline and set goals*

- Rockwell Automation programs historically produce an ROI of 100% – 200% per year
- Reduce MRO Costs with warranty tracking
- Implementing & sustaining asset management programs is a journey
- Extend asset lifecycle with tailored parts & support programs

- Repairs provide 50% savings versus purchasing a new product
- Extends product life span
- Increases working capital and reduces spares inventory
- Minimizes environmental waste improving companies' sustainability footprints

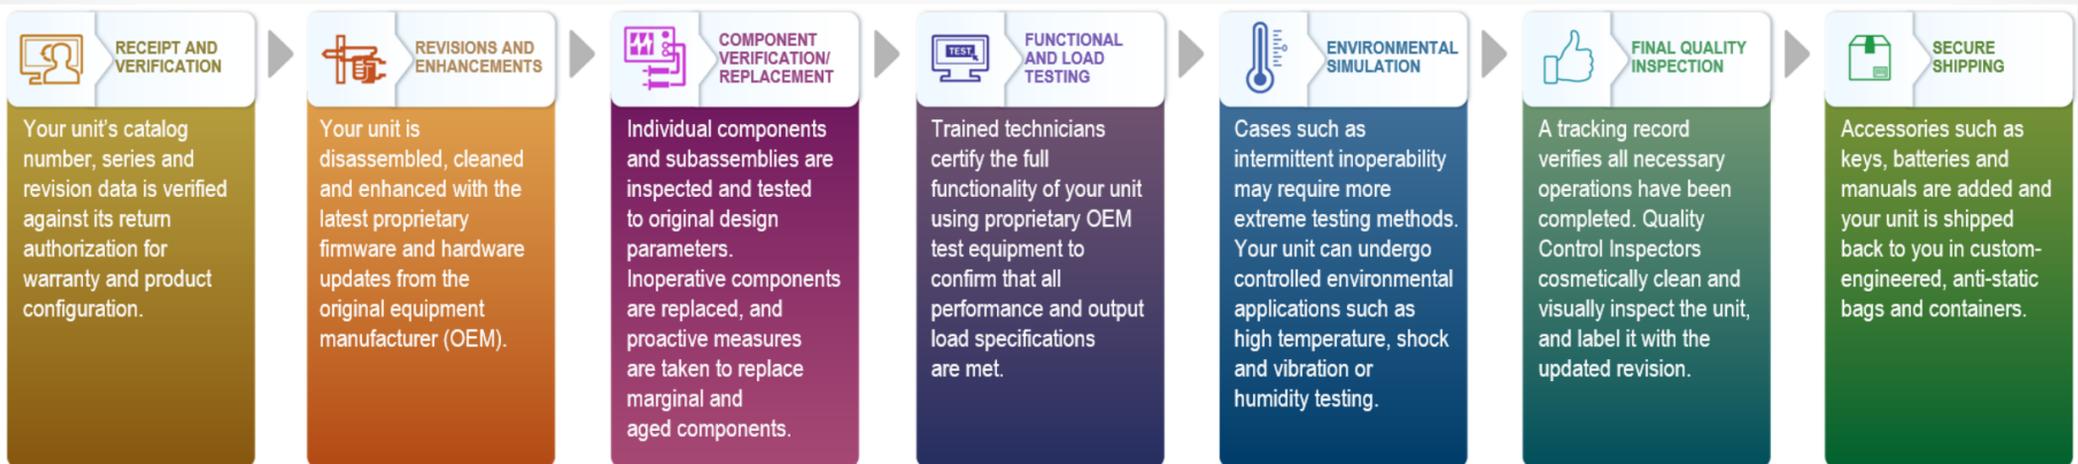

# The right remanufacturing partner can move you towards your productivity goals

Mequon, WI Remanufacturing Center

Up to **50%** savings over cost of new when remanufacturing is the base component of your MRO strategy
