

WEBINAR

SMART SAFETY

Enabling performance improvements while prioritizing workplace safety

Join SMC in this **live** webinar as we discuss Smart Safety capabilities and options to integrate in your facilities. Smart capabilities enable end-users to gain new efficiencies, improve product quality, and make operations more responsive by harnessing the power of safety and operational data.

Hear from SMC's TÜV RHEINLAND specialist, Billy Pendergrass.

Improve insight into worker behavior and compliance

By incorporating safety information into EHS management systems, day-to-day discrepancies between policies and operating procedures can be identified.

AGENDA

- Introduce the Smart Safety philosophy and how we integrate safety
- What is a smart machine?
- Explore the safety lifecycle toolkit
- Review safety function documentation
- Discuss safety assessments
- What steps can you take now?
- Showcase the SMART! Safety Manager App - an easy-to-use, cloud-based tool, that allows quick recording into a single database:
 1. Consistently captures the risk of an accident anywhere in your workplace
 2. Consistently ranks the risk of this potential accident on a quantifiable scale
 3. Consistently tracks each risk to completion

VIRTUAL WEBINAR

DETAILS

April 18, 2024

11:30 AM - 1:00 PM

Virtual Webinar

FREE (a \$350 value!)

All attendees will receive a \$25 gift card to enjoy lunch following the event
