

- TECH EXPO -

Innovations in Integrated Infrastructure & Security

Join SMC and our top partners as we deep-dive into the cutting-edge of industrial technology and implementation. We'll feature systems and solutions aimed at driving **smart, secure, and connected environments**.

Why Attend?

➤ Discover Cutting-Edge Innovations

Be among the first to see the newest technologies and approaches from SMC and our partners.

➤ Gain Actionable Insights

Learn practical implementation strategies to enhance your infrastructure and fortify your security.

➤ Act Now, Save Later

Learn to streamline operations and enhance security postures through intelligent automation. Identify and address issues faster than ever before.

➤ Improved Integrations

Understand how to make your diverse tech stack work together seamlessly and securely.

Industry-Leading Tech Partners

PANDUIT®

FLUKE

NOKIA

LEVITON®

+ MORE!

This isn't just another tech event; it's your opportunity to **discover how to seamlessly build, manage, and protect your most critical IT assets.**

SEPT. 11 | 9 AM - 3 PM

WHITE RIVER
CONFERENCE CENTER

600 W SUNSHINE ST.
SPRINGFIELD, MO 65807

EVENT SHOWCASES:

<i>Access Control</i>	Discover next-gen solutions for secure, scalable identity management and entry systems.
<i>Paging Systems</i>	See advancements in campus and facility-wide paging for clear, instant communication.
<i>Cameras & Surveillance</i>	Experience intelligent video analytics, high-resolution imaging, and integrated security monitoring.
<i>Cybersecurity</i>	Dive into tools and strategies that protect your networks, assets, and data in an increasingly connected world.
<i>Mass Notification Systems</i>	Learn how modern MNS platforms ensure rapid, targeted emergency communications.
<i>Connectivity</i>	Examine robust network solutions powering seamless data flow across complex infrastructure.
<i>Fiber Optics</i>	Get hands-on with high-speed transmission technologies enabling next-gen bandwidth and performance.
<i>Underground Construction</i>	Explore innovations in trenching, boring, and infrastructure deployment beneath the surface.
<i>Carrier-Grade Electronics</i>	Preview reliable, scalable hardware designed to meet telco-level demands
<i>Network Switching</i>	Evaluate high-performance switching solutions that drive speed, redundancy, and control.
<i>Door Hardware</i>	Understand the integration of mechanical and electronic hardware for smarter entry systems.
<i>Cellular Repeaters</i>	See how signal-boosting technologies are solving coverage gaps in buildings and remote locations.
<i>Professional Integration Services</i>	Learn how expert design, deployment, and support services ensure seamless interoperability across all systems—maximizing performance, compliance, and ROI.
