COURSE NUMBER FTAC-EL FACTORYTALK ASSETCENTRE SYSTEM DESIGN AND IMPLEMENTATION

Overview:

This course (FTAC-EL) provides you with the skills required to use FactoryTalk® AssetCentre software to maximize your control system investment and manage assets effectively. Throughout the course, you will be shown how to:

- Design a FactoryTalk AssetCentre system
- Install and configure FactoryTalk AssetCentre software
- Configure and organize the asset tree
- Manage asset configuration files
- Backup and recover operating asset configurations
- Track user's actions
- Secure access to the control system
- Troubleshoot your system using FactoryTalk AssetCentre software

Objectives:

- Getting Started with a FactoryTalk AssetCentre System
- Establishing a FactoryTalk AssetCentre System Architecture
- Installing the Required Software for a FactoryTalk AssetCentre System
- Configuring and Organizing the Asset Tree in FactoryTalk AssetCentre Software
- Archiving and Managing Files in FactoryTalk AssetCentre Software
- Configuring Disaster Recovery and an Asset Inventory
- Backing Up and Restoring Critical Software Configurations
- Finding a System Event Using FactoryTalk AssetCentre Logs
- Planning Security for a FactoryTalk System
- Configuring Application-Layer Security in the FactoryTalk Directory
- Configuring Security within FactoryTalk AssetCentre Software
- Viewing System Information from the FactoryTalk AssetCentre Web Client
- Troubleshooting a System Using FactoryTalk AssetCentre Software

Who Should Attend:

This course is intended for individuals who need to develop FactoryTalk View SE local (stand-alone) or network distributed applications.

Prerequisites:

To successfully complete this course, experience operating a personal computer within a Microsoft Windows 7 environment is recommended.
