SMC™

IN-PERSON EVENT

West Plains, MO

ROADMAP TO INDUSTRY 4.0

NEXT STOP: CONNECTED, SECURE, INTELLIGENT MANUFACTURING

Secure By Design

Build cyber resilience into your OT environment from the ground up

Data-Driven Intelligence

Turn machine data into actionable insights for predictive maintenance and optimization

Safety First

Protect your workforce with real-time monitoring and smart safety technologies

Seamless Integration

See how physical and digital architectures work together in a connected ecosystem

---

Transform your operations at your own pace. This immersive experience gives you hands-on access to the technologies and expertise you need to modernize your manufacturing floor—without the pressure of a traditional sales pitch. Walk away with practical solutions you can implement immediately.

▶ Protect Your People & Assets

See how real-time voltage detection, vibration monitoring, and hot spot detection can prevent accidents before they happen. Get hands-on with the Proxxi Band and discover monitoring solutions that keep your team safe and your equipment running.

▶ Modernize Your Drive Systems

Find your migration path from aging PowerFlex 755 systems. Explore the latest 755T Series with Active Front End technology, discover TotalForce innovations, and learn how Guardian AI can optimize your motor control. Plus, take advantage of the MV Quickship Program to reduce your downtime.

▶ Revolutionize Material Movement

Stop managing disconnected automation islands. See how AMRs, Independent Cart Technology, and smart robotics can create autonomous material flow throughout your facility. Learn to centralize control, contextualize data, and make faster, smarter decisions about your operations.

Save The Date 📅

14 APR — **SPRINGFIELD, MO**
Interactive demos, industry experts, leading solution providers, and lunch on us!

Can't Make It?
Join our satellite events - coming near you!

15 APR — Monett, MO

16 APR — Lebanon, MO

17 APR — West Plains, MO

Secure Your Connected Factory

Cyber threats don't wait—and neither should your defense strategy. Experience live demonstrations of Intravue, Cyber Vision, and Zero Trust architecture designed specifically for OT environments. Learn how to harden devices you can't patch and protect automation cells with Cisco ISE integration.

Optimize Pneumatic and Motion Control

Reduce energy costs and improve precision with SMC's latest safety-integrated solutions. Explore VPX Safety Systems, EX600 CIP Safe technology, and electric actuators with IO-Link connectivity. Use the Pneu-safe online tool to design your ideal pneumatic system on the spot.

Make Data Work For You

Turn machine data into preventive maintenance schedules, efficiency gains, and cost savings. See the Plex smart manufacturing platform and SMC's AMS Digital Architecture in action. Learn how to connect sensors, visualize performance, and predict problems before they stop production.

Automate With Confidence

From advanced HMI panels to industrial robotics, get practical demonstrations of automation that actually works in real-world conditions. Talk directly with experts who understand your challenges and can show you proven solutions.

Complete Your Roadmap to WIN

When you complete your journey, submit your roadmap card and enter your entire company for a chance to win the grand prize - **a mini fridge!**

Why Attend?

- **Learn at your own pace:** No rigid schedule—explore what matters to your facility
- **Hands-on access:** Touch, test, and ask questions before you invest
- **Expert Guidance:** Talk directly with specialists who understand your industry
- **Practical Solutions:** Walk away with implementable strategies
- **No Pressure:** Focus on learning and exploring new technology - buy when you're ready

Attend if You're:

- Looking to modernize aging equipment or processes
- Concerned about worker safety and want better monitoring
- Struggling with cybersecurity in your OT environment
- Managing disconnected systems
- Wanting to see solutions in action before purchasing
- Facing pressure to reduce downtime and increase efficiency
