# Ask yourself

1 Do you have accurate lifecycle information on your control units and know what's currently being manufactured, discontinued or obsolete?

2 Do you have a plan to manage and mitigate your lifecycle risks in real time?

If you answered NO, you may be at serious risk of unexpected shutdowns, emergency repairs and unplanned capital expenditures.

Get Started Today! Installed Base Evaluation (IBE): Here's how it works

SMC
OUR KNOWLEDGE IS YOUR POWER

Field collection

We dispatch an experienced Automation Control Unit Technician to your site to collect the necessary data including photos, panel information and critical notes.

Data analysis

The data is entered into My Equipment to give you a real-time understanding of lifecycle risk by site, area, line machine and panel.

Risk evaluation Report

You'll get a final report which includes corporate risk for downtime and recommended actions to mimimize plant downtime risk and boost plant performance.

Real-time insight

You get a FREE 12-month subscription to My Equipment to give you plenty of opportunity to evaluation the power of this application.
