

AUTOMATION

Connected Components Workbench with M800 Starter Kit

In this hands-on technical course, beginners will learn basic programming. Upon completion of this course, students will receive a Micro850 controller and a 4" Panelview800.

This course will review:

- Basic programming of a Micro800 controller using Connected Components Workbench software (CCW)
- Advantages and application use of a Micro800 controller
- Integration with other devices such as variable speed drives (VSD) and human-machine interface screen (HMI)

M800 Starter Kit includes:

- Micro850 Controller
- 24V DC Power Supply
- 4" PanelView800 HMI
- 2 Channel Analog Input Plug-in
- Input Simulator
- 1 Meter USB Cable
- 1 Meter Ethernet Cable
- Connected Components Workbench Software
- Installation and Getting Started Guide

Wednesday, October 16
8 AM - 5 PM
