OUR KNOWLEDGE IS YOUR POWER

EVENT AGENDA

# FactoryTalk Optix
OUT-OF-THE-BOX WORKSHOP

The latest innovations in HMI can greatly impact business. This workshop on the FactoryTalk® Optix™ portfolio will offer exclusive insights about to how to leverage this technology. The portfolio includes hardware and software that works together and allows for broad interoperability.

WHAT TO EXPECT

Get hands-on experience with the products, engage with experts, and learn what make makes the FactoryTalk® Optix™ portfolio different in this one-day workshop.

- **Explore how to streamline your HMI design process** using capabilities like reusable code libraries, pre-built recipes, localization, data logging, style sheets, multi-user collaboration, web-based design and test, integrated version control, and more.
- **Learn how you can build future-ready offerings** with a versatile, extensible HMI solution that supports diverse hardware environments and customer requirements using open standards.
- **Gain insight on options for addressing price-functionality tradeoffs,** including a variety of hardware options and a modular licensing model – so you only pay for the features you need.
