COURSE CCP146

Studio 5000 Logix Designer Level 1:
ControlLogix System Fundamentals

This course is designed for individuals who have little to no experience working with Logix5000 systems or other programmable controllers. After completing this course, students should be able to perform basic ControlLogix and Studio 5000 Logix Designer tasks, such as:

- Creating and configuring a project
- Communicating with a controller

This course will assist in developing and building a solid foundation with a fundamental knowledge of ContolLogix and other Logix5000 systems.
Introducing basic Logix5000 concepts and terminology, and gaining exposure to Logix5000 system hardware are some of the advantages this course offers.

Tuesday, October 15 - Wednesday, October 16
8 AM - 5 PM

SMC Springfield
585 N Washington Ave
Springfield, MO 65806

Cost: $2,162
Includes Lunch
