TRAINING

This one day class will give the attendee the knowledge to pick and size the appropriate drive, and then correctly install, program and commission it. It will cover basic operation, parameters and trouble-shooting on Allen Bradley Powerflex 750 and 520 series drives.

There will be Trainer Units available for hands on application of the fundamentals learned. Attendees will receive a free 1203-USB cable which will be used to program the Drive using CCW (Connected Components Workbench). We encourage all attendees to bring their own laptop to use for the exercises.

+ HANDS-ON

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises.

COST

\$950

Includes lunch
