VFD Programming and Troubleshooting

This course will cover start-up, parameter setting and troubleshooting of PowerFlex 750-Series VFD's using the HIM interface and using Connected Components Workbench software.

Individuals attending this training will learn through instruction and hands-on labs the essentials such as:

- Navigating parameters
- Drive set up (analog and digital)
- Ethernet control
- Basic fault and alarm codes
- Basic troubleshooting

Wednesday, March 12
8 AM - 4 PM
